

PRODUCT BROCHURE

reduce cost & waste **improve hygiene**

A person wearing a white lab coat is using a touch-free hand sanitizer dispenser. The person's hands are positioned under the dispenser's nozzle. The background is a blurred clinical or laboratory setting. The entire image has a teal overlay.

▶ REDUCE COST & WASTE. IMPROVE HYGIENE.

Reducing costs usually means you get a compromised product or service.
Not with us. We use controlled dispensing systems that are extremely cost effective and our touch-free dispensers limit cross-contamination, dramatically improving the hygiene of your site.

about us

Hygiene Systems is an innovative and dynamic provider of specialist hygiene products and services. We were founded in 1998 and our unique approach has helped us to steadily grow into the nationwide company we are today.

We are **Australian owned and operated** with operations both here and in New Zealand. Our Head Office is in Yatala, Brisbane and we have bases in Sydney, Melbourne and Perth.

We have a large distribution network based around the country enabling us to service in most Australian cities.

We provide **specialist** hygiene dispensers and consumables, many of which are designed right here in Australia, specifically for the Australasian market.

Whether it's hand hygiene or surface sanitising, we've got you covered with our **controlled dispensing systems**.

Our promise: we guarantee to reduce your costs and waste whilst improving the hygiene of your site.

customer focus

A safe clean environment for you, your staff and your customers is essential. With this in mind it is extremely important to use a specialist hygiene company to provide assurance when dealing with health and hygiene.

Our promise when dealing with a new customer is to **reduce cost, reduce waste and improve hygiene**. We firmly believe that when comparing a like for like product, no company in Australia can match our costs.

We can make this promise because we specialise in **touch-free controlled dispensing** which allows you to manage your waste and costs-in-use whilst reducing the risk of cross-contamination.

It's not just about our products though. As a customer of Hygiene Systems you will have **regular contact** with our Customer Care Team to look after any additional requirements. Our Operations Team will **maintain your equipment**, keeping it looking good and working perfectly. We'll deliver your orders **on time** and be on site when you need us. We'll let you know when we have developed new products through **advancements in technology** that improve performance or reduce costs. We'll also strive to minimise our **environmental footprint** whilst still delivering on our hygiene promise.

Have a look through our brochure and feel free to call one of our team on 07 3801 8500 to discuss your unique requirements.

education & childcare

food processing

healthcare

sector focus

public facility & recreation

Our customer base is large and varied because our products and services cover the entire market. We meet the needs of all businesses whether you are a large multi-site corporate or a small local start-up company.

We have extensive experience working within all sectors including the **food processing, healthcare, public facilities** and **hospitality** sectors as well as general **corporate and commercial** organisations. We also work with an array of public sector clients including **government** offices and **education** facilities.

When we plan a system for **your** business we tailor our products to meet the demands of your sector as well as your own unique requirements.

We consider the **hygiene requirements** of your organisation, and how our products can support effective health and safety practises.

We look at **how many people** use your facilities and their expectations for the level of hygiene.

Any **specific needs** are factored in along with any industry requirements and we evaluate your existing systems and services so we can see exactly where improvements can be made.

All this results in a **personalised system** that works for you.

multiroll

multifold

NEO is our premium range of washroom hygiene equipment. Available in traditional white or contemporary black. We can even customise the faceplate of certain dispensers with your own desing or messaging. Get in touch today for a free, no obligation hygiene consultation.

autotowel

touch-free paper towel dispenser

The Autotowel Touch-Free Paper Towel Dispenser is a controlled paper towel system which reduces cost, waste and the risk of cross-contamination.

The Autotowel is one of the most efficient hand hygiene systems in the world. With adjustable dispenser settings, you can customise the system's sheet length and mode of operation to meet the needs of your washroom environment. The high-capacity design reduces maintenance and allows exceptional control over service intervals.

The Autotowel also has a unique stub roll delivery feature which allows a continuous feed from the partially finished roll to the new roll, avoiding any wastage. The use of the stub roll feature can save up to 20% of paper waste.

The perfect partner to the Autotowel is the Wastecare Bin. The bin sits directly below the Autotowel and encourages users to ball used towels, saving space and reducing maintenance.

Options: 2 ply White or Blue, 3ply White or Blue, Maxi White or Blue, 1py Recycled White.

wastecare

wall mounted waste paper bin

The Wastecare Bin combines style and function in one easy to use product and is the perfect partner to the Autotowel.

The Wastecare Bin houses a roll of 25 replacement fragranced liners, known as **multiliners**, within the unit. The specially designed multiliner removal and replacement system ensures quick and easy servicing. The bin is wall mounted for easy cleaning under and around the unit and features a chemical resistant chute which is removable for cleaning.

The design of the chute, with its compact aperture, influences the reduction of waste by encouraging users to ball used towels to fit. This means bins don't overflow and the liners last longer.

As well as partnering the Autotowel, the Wastecare Bin can be used in kitchens, offices, hallways, reception areas – anywhere that requires rubbish collection. The multiliner can also be used for lining small office bins.

We also offer the Wastecare Bin as a recycle bin with colour coded chutes for different recyclables; green for organic, blue for paper and yellow for other recyclables.

femcare

sanitary unit

The Femcare Sanitary Disposal Unit provides a discreet and trusted solution for the washroom and is available in touch-free or manual options to suit any budget.

Each unit is professionally serviced and sanitised. Femcare uses a double lined system for extra protection and a removable chute for easy cleaning. Waste is collected during use in the interior liner which is removable and degradable. The touch-free sensor operated lid on the Femcare Auto ensures the user never has to touch the unit. The user is never exposed to the contents of the unit during use.

A simple, coloured identification system for matching the service completion with the schedule ensures service flexibility and accuracy. It also allows you to quickly identify that a service has been completed.

In conjunction with the double lined system, we use a natural, non-toxic antimicrobial sachet placed in the interior liner that helps to eliminate odour and bacteria through an advanced vapour action.

Antimicrobial agents are added to the moulding during manufacture which inhibits the growth of a broad spectrum of germs and reduces surface bacteria by up to 99.9%.

Femcare units can be wall mountable or free standing.

seatsan

toilet seat and surface sanitiser dispenser

Effective against all harmful bacteria commonly found on and around toilet seat fixtures, surfaces and other fixtures and fittings.

Even seemingly clean surfaces can harbour vast numbers of harmful bacteria. Easy to use Seatsan provides the user the opportunity to clean and sanitise surfaces such as toilet seats effectively before use. Seatsan is the perfect partner to our Multi-roll double toilet tissue dispenser.

Seatsan sanitising chemical is ultra quick drying and will kill up to 99.9% of common germs. Patented sealed-until-installed pouches ensure installation of refills is quick, simple and contamination free.

multiroll

double jumbo toilet tissue dispenser

Innovative design.

The Multiroll Toilet Tissue Dispenser creates space in the cubicle without skimping on toilet roll availability and it assists with reducing wasteful use of toilet tissue caused by poor quality dispensing.

Traditionally, large toilet tissue dispensers in a cubicle are easy to damage and do not cut toilet tissue as effectively as they should. Our Multiroll has a unique soft-edge cutting feature as well as vastly superior finishing.

The soft-edge cutting blades have antimicrobial agents added during manufacture which inhibits the growth of a broad spectrum of germs and reduces surface bacteria by up to 99.9%.

Multiroll partners with Seatsan to significantly reduce cross-contamination.

manual soap

manual soap & sanitiser dispenser

The Manual Soap dispenser combines a next generation dispenser design with disposable and recyclable high quality cartridges and pumps.

Each cartridge is fully recyclable and comes with a brand new pump, ensuring consistent product delivery and lower maintenance requirements. The closed cartridge system also eliminates contamination.

Options: Luxury Foam, Antibacterial Foam, Antibacterial Hand Gel & Surface Sanitiser.

autosoap

mvp auto soap & sanitiser dispenser

MVP auto touch-free dispensing is the most hygienic method of dispensing soap or sanitiser.

The MVP range of reliable automatic dispensers and cartridges have been developed to combine the best features of effective commercial soap and sanitiser dispensing. Each cartridge is fully recyclable and comes with a brand new pump, ensuring consistent product delivery and lower maintenance requirements.

The closed cartridge system also eliminates contamination.

Options: Luxury Foam, Antibacterial Foam, Antibacterial Hand Gel & Surface Sanitiser.

quadrasan

mvp urinal & toilet sanitiser dispenser

Quadrasan® is a programmable cleaning and continuous dosing system, ensuring toilet and urinal fixtures remain clean, sanitised and odour free.

Quadrasan products coat the surfaces of toilets and urinals to prevent deposit build up and malodour.

The Quadrasan system provides flexible programming options which allow costs to be fixed and ensures that fragrance delivery and odour control are matched to location conditions.

Various sanitiser product options are available, including a biological sanitiser.

airoma

mvp automatic air freshener

Ensure your site smells clean and fresh with the Airoma® automatic air freshener.

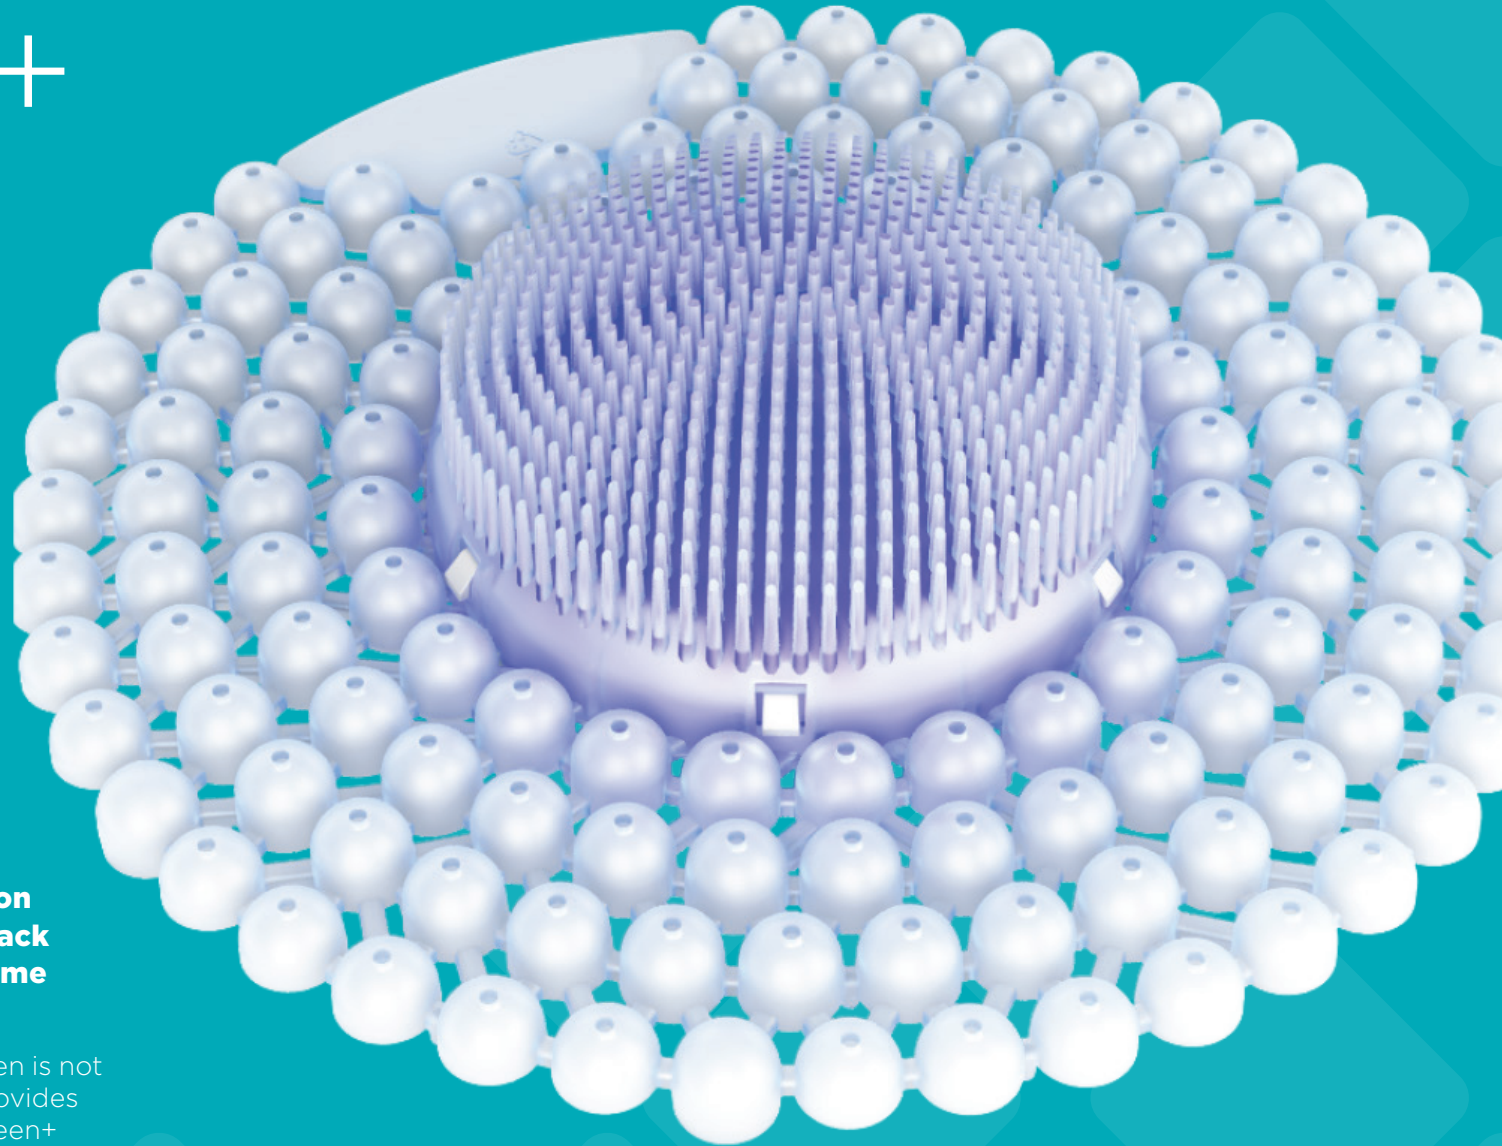

Airoma® automatically delivers bursts of fragrance at specific intervals in order to keep malodours at bay. Airoma's small particle technology means the fragrance stays airborne longer than other similar systems. The dispenser provides flexible and easy to use programming options, and can be set specifically for your location conditions.

The Airoma unit also has the option of having a high quality, natural pyrethrine refill to control flying insects in sensitive areas.

Fragrances: Apple Orchard, Cool, Citrus Mango, Citrus Tingle, Exotic Garden, Linen, Mystique, Sensual, & Zero.

V-screen+

urinal deodourising mat

V-Screen+ is the world's first triple action urinal screen, offering 60 days splash back protection with a dual fragrance & enzyme protection.

The active central core in the V-Screen+ screen is not only designed to reduce bacteria, but also provides a secondary fragrance for urinal areas. V-Screen+ helps to prevent blockages in urinals & uric salt build up in pipes. V-Screen+ can also be used effectively in waterless urinals.

Fragrance: Citrus Mango

autosanitiser

touch-free hand sanitiser

The Autosanitiser Spray Station is the easy way to minimise cross-infection in any area without the use of soap or water.

Washing your hands with soap and drying your hands with a paper towel still produces the most hygienic results, however, soap and paper cannot be installed everywhere. The Autosanitiser is available either as a wall mounted or free standing unit.

The touch-free sensor provides each user with either one, two or three doses of antibacterial spray that kills **99.9% of common germs**. Refills are available in alcohol or alcohol free options.

The Autosanitiser is ideal for entry and exit points especially in reception areas of any type of facility.

easy ordering

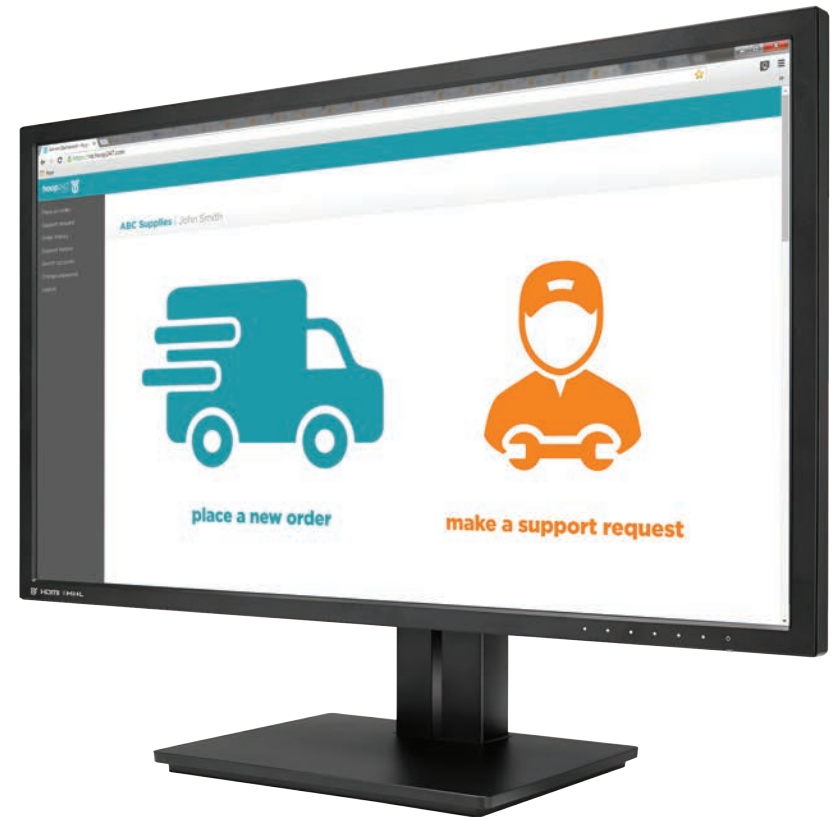

place your order with **hoop247** online

The desire to be fully accessible led us to develop hoop247, our online processing system that allows customers a personalised service 24 hours a day, 7 days a week, 365 days a year: anywhere, anytime.

Through **hoop247** you can access your full order history, track current order progress, configure standing orders, make support requests, view product safety information, and have orders confirmed instantly. The system can be set to send you a reminder of when to order and allows you to easily make repeat orders. Ordering is **controlled**, so you can only order products and services you need. Your dashboard stays uncluttered and there's no risk of placing an incorrect order.

There is also a chat feature if you want to ask us anything or if you just want to say hello to our Customer Care Team!

products

Everything we provide is part of a system. We invest in quality hardware and products to achieve the most effective hygiene solution for our customers.

Our products come with various options to suit your unique requirements. We have liquid and foam **soaps**, dairy certified soaps, body wash soaps and antibacterial soaps. Our **sanitisers** can be alcohol based or alcohol free. Our paper towels can be 1 ply, 2 ply or 3ply, recycled or non-recycled and blue or white. You can have a standard roll or a maxiroll. **Toilet tissue** is equally diverse.

Each product we offer, be it paper, soap, sanitiser, wipes, or dispensers reflects our desire to help customers reduce cost, reduce waste and ultimately, improve hygiene.

We have our own range of soaps and sanitisers. These are supplemented by a range of third party products. All of our products are manufactured to an extremely high standard and meet safety and quality certifications around the world.

Our chosen systems also reflect our belief of providing sustainable products in all facility environments.
