CLEANER. SAFER. HEALTHIER

ECOLAB®

Scrub Free Bathroom Cleaner & Disinfectant is listed in the ARTG and has been proven to kill the following Bacteria, Viruses, Mildew & Fungi:

Directions For Use

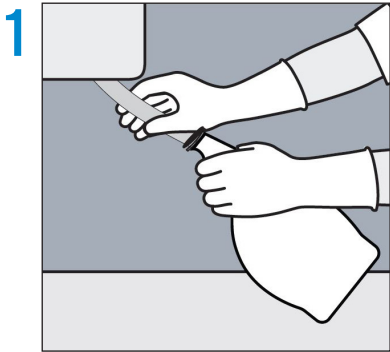

This product is a one step disinfectant designed for use on hard, non-porous environmental surfaces and is effective against the bacteria, viruses, fungi and mildew specified in the adjacent tables. This product is recommended for daily use in: bathrooms, shower rooms and spas, shower stalls, tubs, tiles, shower doors, shower curtains, restroom fixtures, urinals, restroom floors, bathroom fixtures, sinks, exterior surfaces of toilets, non-food contact surfaces of coolers, glazed tile, linoleum, plastic (such as polyethylene, polypropylene, polyvinylchloride), chrome, glazed porcelain, stainless steel, glass, and walls. This product is not recommended for use on marble. This product is not for use on food contact surfaces.

FOR GENERAL CLEANING:

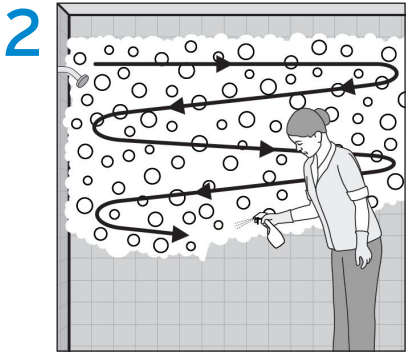

Using Ecolab dispensing equipment, fill a plastic spray bottle or a pump-up sprayer with the pre-diluted solution daily or as required. Your Ecolab representative will ensure the dispensing equipment is set to the correct dilution before use. For general cleaning under dirty conditions, Scrub Free Bathroom Cleaner & Disinfectant is used at a rate of 16-48mL in 1 litre of water.

FOR DISINFECTING & CLEANING:

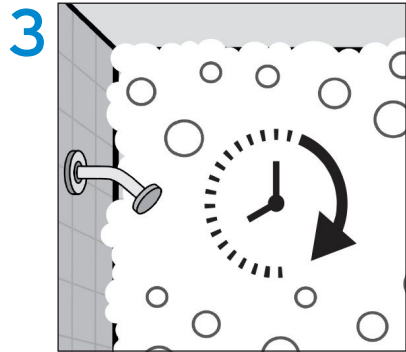

Using Ecolab dispensing equipment, fill a plastic spray bottle or a pump-up sprayer with the pre-diluted solution daily or as required. Your Ecolab representative will ensure the dispensing equipment is set to the correct dilution before use. For disinfection under dirty conditions, Scrub Free Bathroom Cleaner & Disinfectant is used at a rate of 32-48mL in 1 litre of water. For heavy duty applications use at a rate of 48mL in 1 litre of water.

1 Using Ecolab dispensing equipment, fill a plastic spray bottle or a pump-up sprayer with the pre-diluted solution. Pre-clean heavily soiled areas before treatment.

2 Apply pre-diluted solution to hard, non-porous surfaces, thoroughly wetting surfaces with a sprayer or pump-up sprayer.

3 All surfaces must remain wet for the time specified in the following tables. Rinse surfaces thoroughly afterwards.

VIRUSES			
In 2 minutes - 32mL/L:	In 5 minutes - 48mL/L:	In 5 minutes - 32mL/L	
SARS-CoV-2 (COVID-19)	Norovirus (Feline Calicivirus)	Human Coronavirus	Influenza B Virus
		Influenza A Virus H1N1	Murine Norovirus
		Respiratory Syncytial Virus	

FUNGI
In 5 minutes - 32mL/L
