Product Information / Wallchart

R.F.S

RINSE FREE SANITISER

DESCRIPTION

R.F.S contains quaternary ammonium compounds. Its excellent germicide activity combined with its “no rinse” properties provides the complete sanitising program.

APPLICATION

R.F.S is formulated as the final rinse sanitiser as part of the cleaning program in kitchen, canteen and food preparation areas. It can be used on all hard surfaces & kitchen equipment.

BENEFITS

- Broad spectrum biocidal activity against both gram positive and gram negative organisms.
- Rinse free formulation

DIRECTIONS FOR USE

Apply R.F.S using damp cloth or spray. No potable water rinse is required if surfaces are allowed to drain/dry completely. R.F.S can be applied by spraying, fogging or mopping onto the required surface.

SUITABILITY OF CHEMICAL FOR FOOD PREPARATION AREAS

When used as directed R.F.S is suitable for use in kitchens and food preparation areas

HEALTH & SAFETY INFORMATION

See separate Safety Data Sheet available on request.
