

SHIMMER

Shimmer is a sophisticated dishwashing powder that uses the power of enzymes to achieve amazing results. Shimmer won't damage cutlery, crockery and glasses like harsh powders can. It can remove dried up and hard to shift stains with the added benefit of oxygen whitening, and with built in anti-scaling agents it will prevent scale build up in the machine.

DIRECTIONS FOR USE

Apply 1 scoop per dish wash cycle, or follow machine manufacturers recommendations.

SAFETY NOTES

Shimmer may cause skin, eye and respirator irritation. Ensure proper technique is used when handling product. For further information consult the Safety Data Sheet.
