

40V Max Walk Behind Sweeper

HEAVY DUTY BRUSHLESS

650mm
CLEANING WIDTH

Product Statement

Makita's NEW 40V Max Brushless Walk Behind Sweeper is designed to effectively pick up debris and dust with a cleaning path of up to 650mm when using the side brush.

Packed with features including 2 stage brush speed & vacuum setting, brush height adjustment and automatic filter cleaning.

Optional accessories include a dust bag to increase capacity up to 47L and an adapter to suit Makpac storage or PDC1200 / PDC1500 Power Supply for longer runtimes.

Product Overview

Product Specifications

SPECIFICATIONS	
Cleaning width	Main brush: 480mm With side brush: 650mm
No load speed (Standard / Quiet)	Main brush: 500 / 350rpm Side brush: 160 / 115rpm
Dust collection capacity	24L
Continuous runtime (Standard mode)	120 minutes (2x BL4050F)
Overall width	677mm
Skin weight	29.3kg
Weight (with battery)	31.9kg (2x BL4050F)
Voltage	40V Max

- **Dual XGT Batteries** – provides long runtime of 120 minutes with 2 x 5.0Ah batteries on Standard mode.
- **HEPA Filter** – High Efficiency Particulate Air filter for high filtration rate of up to 99.97%.
- **2 Stage Suction & Brush Speed Control** – Allows the user to achieve optimum runtime and performance for their task.
- **Quiet Mode** – Operates at just 56dB to limit disturbance to nearby people.
- **On-board Storage** – adapter for connecting Makpac storage boxes on top for additional batteries or cleaning products.
- **Filter Cleaning Mechanism** – vibrates the filter assembly to remove dust and maintain airflow.
- **Brush Height Adjustment** – main and side brushes can be adjusted according to surface and brush wear.
- **Folding Handle** – quickly adjusted to suit users height and collapse for vertical storage.

Advantages

Performance

3 Independent motors operate the brushes, dust extraction fan and filter cleaning

Convenience

Designed to stand vertically to reduce space needed for storage

Functionality

Easy to operate controls for vacuum & brush speeds as well as battery level indicator

Versatility

Optional collection bag increases capacity to 47L – perfect for bulky waste

Convenience

Main operation control is at the users fingertips including On/Off, Brush & Vacuums speed, Filter vibration & headlight control.

Side brush operation and adjustment is located on the side of the handles and height adjustment of the main brushes is on the side of the machine.

Performance

Brushes operate towards each other to maximise material collection while the vacuum function creates airflow to help collect finer dust which can be collected into the hopper.

Collection Capacity

Optional dust bag can be fitted to expand collection capacity up to 47L. Particularly beneficial for users who primarily collect bulky material including leaves & rubbish.

Optional Accessories

1913F7-8

47L High Capacity Dust Bag

1913F5-2

Adapter Set
(Suits Makpac & PDC1200,
PDC1500)
